Synopsis

NCQA is releasing documentation to solicit feedback on proposed retirement of the Hybrid Method for four existing measures for HEDIS 2010. Reviewers are asked to submit their comments in writing via the public comment website to NCQA by **midnight (ET) on Tuesday, June 23, 2009**.

Submitting Comments

Submit all comments via NCQA's Public Comment Web site. NCQA implemented this method to streamline the process and make tracking and assessing submitted comments more efficient. Use the following link to the Public Comment Web site: www.ncqa.org/publiccomment.aspx **Note:** NCQA will no longer accept comments via mail, e-mail or fax.

How to Submit a Comment

1. Enter the following information.
 - Your e-mail address
 - Your contact information
2. Choose from the following options.
 - Select **Proposed Modification for HEDIS 2010**
 - Select **Retirement of Hybrid Methodology in the Commercial Product Line**
 - Select your support option (e.g., *Support, Do not support, Support with modifications*)

Note: *If you choose Do not support, include your rationale in the text box. If you choose Support with modifications, enter the suggested modification in the text box.*

3. Enter your comment into the text box. *There is an 1,800 character limit.* If you exceed the limit, your comment will be cut off at 1,800 characters.

Note: *We suggest that you develop your comment in Word, in order to check your character limit, and save a copy for reference. Use the "cut and paste" function to copy your comment into the text box.*

4. Submit additional comments using the same process.

Comments must be received by **midnight (ET) on Tuesday, June 23, 2009**, to be considered.

NCQA Review of Public Comments

NCQA appreciates the time and effort required to collect and submit comments. All feedback submitted within the Public Comment period is reviewed by NCQA. Due to the high volume of comments received, NCQA cannot respond to individual comments; however, NCQA Measurement Advisory and Technical Panels consider all comments and advise NCQA staff on appropriate recommendations to take to the Committee on Performance Measurement (CPM), a committee containing representatives from purchasers, consumers, health plans, health care providers and policy makers, that oversees the evolution of the measurement set. The CPM also reviews all comments before making final decisions for HEDIS 2010.

Items for Public Comment

Detailed documentation (e.g., memos) is available on the NCQA HEDIS 2010 Public Comment home page for your review.

Proposed Changes to Existing HEDIS Measures

NCQA proposes retiring the Hybrid Method for the commercial product line for the following four measures:

1. Well-Child Visits in the First 15 Months of Life
2. Well Child Visits in the Third, Fourth, Fifth and Sixth Years of Life
3. Adolescent Well-Care Visits
4. Cervical Cancer Screening

HEDIS Overview

HEDIS is a set of standardized performance measures designed to ensure that purchasers and consumers can reliably compare the performance of managed care organizations (MCO) and preferred provider organizations (PPO). It also serves as a model for emerging systems of performance measurement in other areas of health care delivery.

HEDIS is maintained by NCQA, a not-for-profit organization committed to evaluating and publicly reporting on the quality of MCOs and PPOs. HEDIS 2009 consists of 70 measures across eight domains of care, and the measures that MCOs and PPOs will report in June 2009 are based on activity that occurred during the 2008 measurement year. Items available for Public Comment are proposed changes to HEDIS 2010, which will be published in July 2009 and reported on in June 2010, based on activity that occurred during the 2009 measurement year.

The HEDIS Measure Development Process

NCQA's CPM—which includes representatives of purchasers, consumers, MCOs, providers and policy makers—oversees the evolution of the measurement set. Measurement Advisory Panels (MAP) provide further leadership and oversight of measures for particular clinical areas or populations and provide recommendations to the CPM. Additionally, the HEDIS User Group (HUG) and HEDIS Expert Panels provide invaluable assistance by identifying issues related to the current measurement set as well as new measures. The Technical Advisory Group (TAG) provides assistance with methodological issues identified during measure maintenance and development.
