August 5, 2013

TO ALL POTENTIAL NCQA-CERTIFIED HEDIS®1 CAHPS®2 PCMH SURVEY VENDORS

The National Committee for Quality Assurance (NCQA) invites you to submit a proposal in accordance with the requirements of the attached request for proposal (RFP): Implementation of the HEDIS CAHPS PCMH Survey.

Your proposal should be delivered by e-mail to CAHPS-PCMH@ncqa.org by Friday, September 6, 2013, before 5:00 p.m. (ET). Proposals submitted by FAX are not acceptable.

A nonrefundable $500 check (made payable to NCQA) must be sent in conjunction with the application. Applications that arrive without a subsequent application fee will not be reviewed or considered.

Include project code 1416-000 on the check.

Send application checks to:

    NCQA
    Department 4038
    Washington, DC 20042-4038

Application length is limited to 40 pages or less. The Technical Proposal Evaluation Criteria includes weights that NCQA will use to evaluate proposals.

This RFP does not commit NCQA to pay costs of preparing and submitting proposals.

Please e-mail requests for information concerning this RFP to CAHPS-PCMH@ncqa.org.

NCQA will notify successful survey vendors in late September.

I. PURPOSE

NCQA’s Patient-Centered Medical Home (PCMH) Recognition program is an innovative program for improving primary care. More than 5,000 practices, representing more than 20,000 physicians, have achieved recognition by meeting NCQA standards. In order to consider patient experiences as part of PCMH evaluation, NCQA offers optional recognition, referred to as “Distinction,” based on reporting results from a standardized patient experience survey, in conjunction with the NCQA PCMH Recognition program. This optional recognition requires practices to use the HEDIS® PCMH version of the CAHPS® Clinician & Group Survey. Practices can earn this additional recognition for collecting data using the survey and methods, and reporting the results to NCQA using an NCQA-Certified CAHPS PCMH Survey Vendor approved to conduct the survey. Distinction for submitting standardized patient experience data is not required for practices to achieve PCMH recognition. Practices also collect survey data for internal quality improvement purposes.

This request for proposal (RFP) covers tasks necessary to produce survey results using the CAHPS PCMH child and adult surveys in accordance with HEDIS protocols. The protocols for administering CAHPS PCMH Surveys are described in the HEDIS 2014 Specifications for the CAHPS PCMH Survey (“Specifications”).

This RFP contains information that survey vendors need to know to manage and conduct this work and to assess their capacity for performing the work. NCQA developed its Survey Vendor Certification program to promote standardization of data collected by multiple survey vendors and, thereby, comparability of results across practices. To become an NCQA-Certified CAHPS PCMH Survey Vendor, an organization must demonstrate that it has the capabilities, experience and expert personnel to collect and report survey results accurately. Each year NCQA trains, certifies and publishes a list of certified survey vendors.

Note: The NCQA Survey Vendor Certification program discussed in this RFP is for conducting the HEDIS CAHPS PCMH Survey only.

II. BACKGROUND

NCQA worked with the CAHPS Consortium, sponsored by the federal Agency for Health Care Research and Quality (AHRQ), to develop a new version of the CAHPS Clinician & Group Survey that addresses specific processes of care relevant to patient-centered medical homes. The CAHPS PCMH Survey includes all core items in the CAHPS Clinician & Group Survey and incorporates additional items to address domains of care identified through multi-stakeholder input as critical for evaluating functions of PCMH practices.

1HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).
2CAHPS® is a registered trademark of the Agency for Healthcare Research and Quality (AHRQ).
There are two versions of the CAHPS PCMH Survey:

1. CAHPS PCMH Adult Version (52 items).
2. CAHPS PCMH Child Version (66 items).

The survey asks about “this provider,” the person named in the first survey item (the provider name is entered in the first item by the survey vendor). The provider may be a doctor, a nurse practitioner (NP) or a physician assistant (PA). A parent or family member responds on behalf of the child in the CAHPS PCMH Child Version of the survey. Both versions of the survey are available online at https://www.cahps.ahrq.gov/clinician_group/. The survey can be administered in English or Spanish.

Survey questions were field-tested and chosen based on their ability to discriminate best among provider practices. They are worded to be understood by a broad range of consumers and are at seventh-grade reading level. One global rating question reflects overall satisfaction with the provider.

Six composite scores summarize responses in key areas.

1. Access
2. Communication
3. Comprehensiveness—Adult Behavioral
4. Self-Management Support
5. Shared Decision Making
6. Office Staff

Item-specific question summary rates are reported for the global rating question and each composite question. Question summary rates are also reported individually for items related to the following concepts.

1. Information
2. Coordination of Care

Survey vendors may include supplemental survey questions; however, NCQA will not collect any data related to supplemental items.

III. SURVEY ADMINISTRATION

A. Overview of Survey Process

Task 1—Survey Management System
Survey vendors use an automated survey management system to track mailings and returned, completed questionnaires; initial and/or follow-up telephone interviews; and data entry. They provide detailed documentation of the survey management system to NCQA in a Quality Assurance Plan (QAP), in Report 1 (refer to Task 4—Survey Vendor Reports).
Task 2—Data Collection
NCQA-trained and certified survey vendors assume responsibility for data collection, processing and submission. Reliability, confidentiality and comparability of each practice’s data are the priority of the data collection protocols. Survey vendors protect the confidentiality of sampled patients when they handle and process patient information in each phase of survey administration.

Task 3—Quality Control
Survey vendors report their quality control procedures for this project in a QAP (refer to Task 4). Survey vendors set up and document quality control procedures for survey implementation, including, but not limited to, training for staff and subcontractors involved in survey operations; printing, mailing and recording receipt of mail surveys; telephone survey administration; interactive voice recognition (IVR) survey administration; Internet survey administration; information and assistance calls handled by the customer support line; data processing, coding and editing; details of response rate calculation; and report preparation. Survey vendors are responsible for providing evidence of quality oversight of all work performed by subcontractors.

NCQA must review and approve all survey vendor-prepared survey materials (e.g., mail, telephone, Internet and/or IVR) prior to fielding. At its discretion, NCQA may conduct onsite visits during survey implementation, to observe data collection and quality processes. NCQA may review survey vendor Web sites for appropriate advertising; may request remote monitoring of survey telephone interviews; and may test customer support numbers.

Task 4—Survey Vendor Reports
Report 1. Contains the survey vendor’s QAP and a preliminary list of practices with which the survey vendor has contracted. The QAP addresses: project staffing; survey resources; confidentiality processes and security practices; a description of the survey management system; the data collection methodology employed; and details of quality control practices.

Report 2. Documents problems with data collection, if any, and suggests process improvements.

Submission of this report is simultaneous with payment of per sample fees (refer to Attachment 3: Survey Vendor Certification Program Pricing Structure).

Survey vendors send the reports to NCQA via email.

Task 5—Submission of Data Sets
Survey vendors provide NCQA with patient-level and results data for each sample. Survey vendors report all data as specified by NCQA, including response rates. NCQA will provide an XML schema for survey vendors to follow. Survey vendors have two opportunities (April and September) to submit data to NCQA during the calendar year.

B. Sampling Requirements
CAHPS PCMH Survey results are collected and reported at the practice level. Because results are collected and reported separately for adult and child populations, each practice is eligible to report results for either or both of the available survey versions depending on the types of clinicians in the
Implementation of the
HEDIS CAHPS Patient-Centered Medical Home Survey

Exclusively pediatric practices should conduct the child survey. Family practices may choose to administer either the adult or the child survey or both.

Two sampling strategies are available for the survey. The first captures patient experiences of care in the last 12 months. The second is ongoing survey administration (e.g., a practice may have the survey vendor administer the survey monthly, using a sample of patients who visited a clinician during the previous month). Refer to the Specifications for more information about the ongoing sampling and survey administration option.

Sample sizes vary by number of clinicians in the practice. Practices may oversample in increments of 5 percent.

**Sample Sizes**

<table>
<thead>
<tr>

<td>500</td>
</tr>
<tr>
<td>20-28</td>
<td>643</td>
</tr>
<tr>
<td>29 or more</td>
<td>686</td>
</tr>
</tbody>
</table>

Eligible clinicians are physicians, NPs and PAs who practice internal medicine, family medicine or pediatrics and are considered primary clinicians for their patients (i.e., only clinicians selected by a patient/family as their personal clinician are eligible; specialists, NPs and PAs who do not have their own panel of patients or who do not practice primary care are not eligible). Clinicians must have an active, unrestricted license as a doctor of medicine, doctor of osteopathy, NP or PA. All eligible clinicians practicing together at a practice site must be included in the survey. All payer types are eligible for the survey.

The adult survey sample is drawn before the child survey sample, in order to de-duplicate the sample frame.

**Onsite Recruitment and Data Collection.** Patient recruitment or data collection at the practice site is not allowed. Research indicates that onsite data collection has the potential to introduce bias into responses. Although the traditional approach of a vendor-conducted survey is perceived as more costly, a recent study conducted by RAND indicated that, when all staffing costs are included, the cost of distributing surveys in the clinic and compiling the results is not less expensive than a survey vendor-conducted survey.

**Incentives and Proxy Responses.** NCQA does not allow practices or survey vendors to use incentives of any kind. The intent for the adult survey is that sampled patients complete their own survey; proxy
responses are discouraged. Either a parent or a caretaker who is familiar with the sampled child’s health care may complete the child survey.

C. DATA COLLECTION PROTOCOLS

The practice and survey vendor select one of the following standard options for administering the survey.

1. The mail methodology, a two-wave, mail-only protocol with two questionnaire mailings.
2. The telephone methodology, a telephone-only protocol with five attempts.
3. The mixed methodology, a one-wave mail protocol (one questionnaire) with telephone follow-up of at least five attempts.
4. The IVR methodology, a telephone protocol with five attempts.
5. The Internet methodology, a two-wave protocol (using mail or e-mail contact attempts) encouraging patients to complete the questionnaire on a secure Internet site.

The basic tasks and time frames for the standard protocol options are detailed in the following tables.

### Mail Methodology

<table>
<thead>
<tr>

</tbody>
</table>

## IV. SURVEY VENDOR TASKS

Survey vendors furnish the necessary personnel, facilities, equipment, materials and supplies to perform the work set forth in the Specifications. Survey vendors provide substantial detail to NCQA concerning their ability to administer the survey.
Survey vendors must have the capacity to administer the survey in at least one of the five approved modes of survey administration detailed in the Specifications. For mail survey administration, survey vendors should be able to administer large-scale questionnaire mailings; for telephone data collection, vendors must conduct telephone interviews using computer-assisted telephone interviewing (CATI) systems. IVR and Internet systems must be able to capture survey data electronically.

Components of the survey administration process as described in NCQA’s Survey Vendor Policies and Procedures (Attachment 1) may be subcontracted if vendors can document that there is oversight of the quality of services provided by subcontractors. Certain components of the survey administration process cannot be subcontracted, as indicated in NCQA’s Survey Vendor Policies and Procedures (Attachment 1). Survey vendors must protect the confidentiality of sampled individuals during each phase of the survey process. Vendors document their policies and procedures for protecting patient confidentiality. Vendors may only transmit or receive PHI via a secure file transfer protocol. Files containing PHI must be encrypted.

1. Survey vendors will establish methods to provide customer support to patients who have questions about the survey. NCQA recommends that vendors administering surveys by mail or by mixed methodology provide live telephone customer support during normal business hours, with a “return call” standard of 24 hours for caller questions that cannot be answered at the time of the initial call, and make an automated attendant or voice mailbox available after hours and on weekends.

2. Survey vendors will draw a specified simple random sample for each practice with which they contract, and draw an adult and/or child sample of all payer types based on the number of clinicians in the practice. Adult samples will be drawn first and households will be de-duplicated before the child sample is drawn, following methods outlined in the Specifications.

3. Survey vendors using the mail or mixed methodology will send a customized initial cover letter and first questionnaire to all sampled patients, with message content and format determined by NCQA. All mailings will be sent first class and have postal bar coding.

4. Twenty-one days after the first survey is mailed, survey vendors using the mail methodology will print and send a second questionnaire to nonrespondents, with a customized cover letter. The cover letter sent with the second questionnaire will differ from the letter sent with the first mailing, with message content and format determined by NCQA.

5. Survey vendors using the mail or mixed methodology are responsible for all reproduction activities (of commercial quality, verified by NCQA), including first-class mail and business reply envelopes.

6. Survey vendors using the telephone, mixed or IVR will obtain telephone numbers from the practice and will update missing or incorrect telephone numbers.

7. Survey vendors using a mail or mixed methodology will scan or key-enter data providing 100% verification and assign a disposition codes as specified in NCQA’s Quality Assurance Plan for HEDIS CAHPS PCMH Survey Measures

8. Survey vendors using the telephone, mixed, or IVR methodology will make five attempts to reach non-respondents at different times of the day, on different days of the week and in different weeks.

9. Survey vendors using the telephone or mixed methodology will program electronic telephone interviewing systems in accordance with specifications provided by NCQA.
10. Survey vendors using an Internet methodology will obtain e-mail addresses from the practice.

11. Survey vendors using the Internet methodology will create a secure Internet survey tool using the CAHPS PCMH questionnaire provided by NCQA.

12. Survey vendors will assign each patient in the sample a disposition code used to track and report whether the patient has completed the survey or needs follow-up contact, as described in the Specifications.

13. Survey vendors will calculate and report survey results as described in the Specifications, including item-specific rates, ratings and composite items.

14. Survey vendors will submit patient-level survey data and results files to NCQA in XML following NCQA’s schema, and will continue to submit data until receiving a validated status from NCQA’s secure online Recognition Portal.

15. Survey vendors will store printed or electronic copies of data. NCQA retains the right to access copies of the data for up to three years after data collection ends.

V. OVERVIEW OF NCQA SURVEY VENDOR CERTIFICATION TERMS

1. If an offeror’s proposal is accepted, at a minimum, the survey vendor project director and project manager must attend survey vendor training. Subcontractors may attend training. Survey vendors pay NCQA a nonrefundable training fee (Attachment 3).

2. Upon successful completion of training, survey vendors sign an Agreement for Survey Vendor Certification with NCQA and pay NCQA a nonrefundable survey vendor certification fee. Certified survey vendors must carry at least $2 million in liability insurance. The term for HEDIS CAHPS PCMH survey vendor certification is one year.

3. Certified survey vendors follow the survey methodology detailed in the Specifications.

4. Certified survey vendors follow NCQA’s grievance procedures (Attachment 1).

5. Certified survey vendors follow the NCQA Guidelines for Marketing and Advertising HEDIS CAHPS PCMH Survey Vendor Certification (Attachment 2).

6. After conducting surveys using established protocols, certified survey vendors pay NCQA a per-sample fee under the terms specified by NCQA (Attachment 3).

7. Certified survey vendors follow the survey process specified and comply with all quality oversight requirements described in the NCQA Quality Assurance Plan for HEDIS CAHPS PCMH Survey Measures, including the submission of Report 1 and Report 2 to NCQA. Survey vendor QAPs include a description of the sampling plan; the electronic survey management system protocol for following surveyed patients through data collection; a description of survey personnel; mode of administration; confidentiality and data security practices, quality control procedures; and a list of practices with which the vendor has contracted.

8. NCQA reserves the right to remove certification from a vendor at any time for cause (e.g., concerns about the quality of data collection and delivery or of safeguarding of patient confidentiality).

9. Survey vendors bear all training and certification costs.

10. Survey vendors assume primary responsibility for all survey tasks conducted by a subcontractor and shall be responsible for performing and providing evidence of quality oversight of any subcontractor’s work as specified by NCQA.

VI. TECHNICAL PROPOSAL Evaluation Criteria (100 Points)

Proposals submitted in response to this RFP are reviewed and evaluated for technical merit by a committee assembled by NCQA, using the rating categories and relative weights specified below. The
NCQA Survey Vendor Certification program is for conducting the HEDIS CAHPS PCMH Surveys only.

The following criteria and weights are used in the technical evaluation of proposals, which comply with the minimum requirements.

1. **Relevant Survey Experience (30 points)**
   NCQA reviews offerors’ technical competence in running large-scale survey research operations. Attention will be paid to the offeror’s experience in conducting large-scale health care services patient-experience surveys. Offerors must demonstrate that they have conducted similar scale efforts within the most recent three-year period. Specific attentions will be paid to offeror’s experience submitting patient experience survey data to an external third-party organization; employing a statistical sampling process in the conduct of previously or currently conducted surveys and the offeror’s experience with primary client management.

2. **Organizational Capacity and Resources (20 points)**
   NCQA reviews offerors’ capacity to execute this project effectively, including access to requisite resources and staff. Depending on the number of health plans that contract with a survey vendor, the potential mail processing volume and number of telephone interviews conducted could be significant. NCQA strongly considers an offeror’s capacity to handle a large volume of mail questionnaires and conduct highly-standardized CATI interviewing in a short time frame. Proposals will include a description of their secure physical facilities available for conducting this project and protecting individual health plan member information, including IT infrastructure, mailing and telephone survey capacity, CATI software with the capacity for remote monitoring and creation of toll-free customer support lines. NCQA does not accept a home-based business as a NCQA-Certified HEDIS CAHPS PCMH Survey Vendor. The use of home-based telephone CATI interviewers will not be considered as qualifying toward meeting criteria.

3. **Project Management and Quality Control (30 points)**
   NCQA reviews proposals for a thorough approach to project management and quality assurance processes for ensuring high quality data through each stage of the data collection process. Offerors must demonstrate the ability to implement an intensive work plan for data collection and describe how their organization performs quality checks on their own and all subcontractor work. Offerors must describe their process for conducting quality checks of the sample frame files received from their physician practice clients to verify accuracy and completeness of sample frame information. Offerors must state how electronic data and returned mail paper questionnaires will be protected and stored to ensure patient confidentiality. Offerors should describe their physical and electronic data security protocols for receiving, processing and storing printed and electronic versions of questionnaires and sample files that protect the confidentiality of patient response data and personal identifying information. These security protocols include, but are not limited to, an offeror’s established electronic security procedures related to access levels, passwords and firewalls and an offeror’s process for identifying and reporting breaches of confidential data. Previous experience with data submission in XML is required.
4. Personnel (20 points)
   NCQA reviews proposals for relevant background and experience of key staff, including project directors and staff members who will directly supervise this work. Proposals will describe staff available to conduct the chosen survey protocol. Offerors must directly employ key staff, including the project director and project manager, who must have strong backgrounds in survey research and methodology and previous experience using specified modes of administration. The offeror’s designated project manager, who oversees all survey operations, must have at least two years of experience in overseeing all functional aspects of survey operations (e.g., mail, telephone, data file preparation and data security). The offeror’s designated sampling manager must have sample selection experience. Information systems staff responsible for data submission (e.g., programmers) must be directly employed by the survey vendor and must have previous experience preparing and submitting data files to an external third-party organization within the past two years. Offerors will indicate whether temporary staff needs to be hired to meet project goals as well as how temporary staff will be recruited and trained (if applicable). Offerors must indicate how the obligations of this project will be met, with consideration of its time frame and of competing obligations. Offerors must have appropriate organizational back-up staff for coverage of key staff.

NCQA may request supporting documentation from applicants. Proposals that do not comply with the minimum requirements outlined in this RFP will not be considered.

Survey vendor selection will be announced in September 2013. Selected survey vendors will attend NCQA WebEx training in November and will enter into a contract (Certification Agreement) with NCQA. Vendors may then contract with practices to perform the survey. The NCQA Web site will list contact information of survey vendors selected to conduct the survey.

VII. TECHNICAL PROPOSAL INSTRUCTIONS
All proposals are confidential. Proposal specifications are as follows:

- A maximum of 40 pages of text
- 12 point Times New Roman or 11 point Arial font, double spaced
- Page margins .75" all around

Extensive appendices are discouraged. Review of supporting materials other than CVs is at NCQA’s discretion. Proposals that merely restate the RFP will be considered nonresponses. To facilitate proposal review and evaluation, proposals will be in the following format:

Name and Contact Information of Primary Contact
Executive Summary
Corporate Background
I. Relevant Survey Experience/Technical Competence
II. Organizational Capacity and Resources
III. Project Management and Quality Control
IV. Personnel (CVs are acceptable as appendices, over and above page limitations.)
Two NCQA staff members will review each proposal. There will be a third, independent review in cases where the scores of the primary reviewers diverge significantly.

NCQA may:
- Approve the proposal
- Ask for revisions to the proposal
- Request a more extensive proposal
- Decline the proposal. *Declined proposals will not be reviewed.*
A. Monitoring Performance
NCQA may periodically conduct onsite reviews of survey vendors to assess the systems in place for data collection and quality oversight.

B. Permissible Subcontracting
The following activities are eligible for subcontracting by certified survey vendors:

- Printing of survey materials including envelopes, questionnaires, and cover letters
- Outgoing mailing of survey packets
- Incoming receipt and data entry/scanning of returned mail surveys
- Telephone interviewing

Survey vendors must provide evidence of their oversight process for each subcontracted activity through written documentation, including, but not limited to, a description of the internal processes and procedures implemented to check the accuracy and compliance with established protocols of all subcontracted activities, internal reports providing evidence that oversight procedures of subcontractors were implemented, and any corrective actions required to remediate subcontractor errors.

The following activities may not be subcontracted:

- Receipt of sample frame from client
- Generation of sample file
- Preparation of final data file
- Submission of data file to NCQA

Subcontracting the development of the sample file and/or the preparation of the final data file is permissible if the delegation of this function is to an NCQA-certified HEDIS survey vendor. Survey vendors remain responsible to provide evidence of their oversight process if activities are subcontracted to an NCQA certified HEDIS survey vendor.

C. Survey Vendor Grievance Procedures
Survey vendors are responsible for the conduct of employees with whom they contract or employ. Survey vendors have a formal grievance procedure in place, which is communicated to practices. Complaints against an employee’s actions or conduct with respect to the survey process will be handled through the grievance process. If a practice is not satisfied with the outcome of a complaint, the survey vendor’s procedure for the specific complaint and the complaint outcome will be forwarded to NCQA for review and investigation. A valid, substantiated complaint that is not resolved satisfactorily by the survey vendor may result in cancellation of the Certification Agreement. Survey vendors must inform NCQA of all unresolved grievances.

D. Marketing/Advertising Guidelines
Refer to Attachment 2: Guidelines for Marketing and Advertising NCQA Survey Vendor Certification.
E. Code of Professional Conduct for NCQA-Certified Organizations

Each survey vendor applying for NCQA Certification must agree to the Code of Professional Conduct for NCQA-Certified Organizations.

In promoting high standards of ethical conduct, employees and subcontractors of the certified survey vendor will:

1. Avoid conflicts of interest and the appearance of conflicts of interest by:
   - Upholding the principle that a vendor may not produce survey results for a client or employer for which an employee or subcontractor of the vendor acts as a member of the audit team for the survey results.
   - Not servicing any private or special interest in fulfillment of the duties of vendor, thereby excluding, by definition, producing survey results for a client or employer that controls, is controlled by, or is under common control with the vendor.
   - Not accepting any inducement, commission, gift or any other benefit from clients or employers, their employees, or any interested party, or knowingly allowing employees and subcontractors to do so, other than payment of fees for performance of the HEDIS surveys.
   - Disclosing to any client or employer any relationships that influence, or give the appearance of influencing, survey results.

2. Conduct themselves professionally, with truth, accuracy, fairness and responsibility to clients.

3. Act as faithful agent for each employer and client.

4. Strive to enhance the prestige and competence of NCQA-Certified vendors.

5. Help employees develop survey skills.

6. Ensure that employees are credited for their work.

7. Not misrepresent any survey team member’s qualifications, competence or experience, nor undertake survey work beyond their qualifications.

8. Maintain confidentiality of all information pertaining to the survey and not discuss or disclose any information unless authorized in writing by the practice and NCQA.

9. Not accept retainers, commissions or valuable consideration from any interested party in exchange for offering confidential information or disclosures related in any way to NCQA, clients, NCQA-Certified vendors or practices.

10. Not intentionally communicate false or misleading information that may compromise the integrity of any survey or any NCQA program.

11. Preface any public statements related to survey results that clearly indicate on whose behalf they are made.

12. Not accept compensation from more than one party for the same service, without the consent of all parties.

13. Not act in any way that would prejudice the reputation of NCQA and the survey results, and fully cooperate with an inquiry in the event of an alleged breach of this code.

F. **Revisions to Policies and Procedures**

At its sole discretion, NCQA may amend its Policies and Procedures, Grievance and Appeal Procedures or any other Survey Vendor Certification program policy.
NCQA encourages survey vendors to publicize their achievement, and has developed these Marketing and Advertising Guidelines toward that end. These guidelines explain how to market certification status and include appropriate language for incorporation into marketing and advertising materials, and ideas for marketing.

Guidelines are designed to help create advertising and marketing materials that reference NCQA status clearly, factually and accurately; to protect the integrity of NCQA’s programs; and to allow all participants to benefit from their achievement in a fair and accurate manner. The most recent version of these guidelines may be found on NCQA’s Web site at www.ncqa.org/marketing.aspx.

Marketing and Advertising Materials

References to the terms “advertising,” “advertising materials” or “advertising and marketing materials” in this document encompass all external and internal communications, including, but not limited to:

- All printed materials.
- TV advertising.
- Radio advertising.
- Posters.
- Annual reports.
- Billboards.
- Press releases.
- Newsletters.
- Responses to RFPs.
- Responses to RFIs.
- HEDIS report cards.
- Durable products (e.g., mugs, t-shirts).
- Letters to employers.
- Letters to clinicians.
- Letters to practices.
- Letters to consumers.
- Letters to insurance brokers.
- Marketing and sales brochures.
- Web sites or other electronic materials.
- Any other promotional materials.

Use of NCQA Logo

The use and reproduction of NCQA’s logo is strictly prohibited. Certified survey vendors are prohibited from using the NCQA logo in any marketing and advertising materials, including Web sites, e-mails and other Web-based applications. Vendors that want to provide a link to NCQA’s Web site should use www.ncqa.org.

Use of Survey Vendor Certification Seals

- NCQA issues one certification seal to Certified Survey Vendors.
- Seals are provided in EPS and JPG formats.
- Seals may not be modified.
- Certification statuses can change, which may affect durable goods (e.g., a billboard that is no longer accurate must be corrected). Vendors must maintain and update marketing and promotional materials,
must cease distribution of all materials with incorrect status information. Updating of Web sites and other distributed materials should take place within 30 days of certification status change.

How to Advertise NCQA Certification Status

- Survey vendors may not say they are the “exclusive” or “preferred” survey vendor for NCQA surveys.
- Survey vendors may not quote NCQA staff in their advertising materials.
- Survey vendors may not release NCQA communications in their advertising or marketing materials.
- Survey vendors may not engage in competitive advertising with other survey vendors.
- Survey vendors should clearly state that they have earned NCQA Certification (e.g., Survey vendor X is NCQA Certified to conduct...).

Recommended Language

NCQA-Certified Survey Vendors may use the following statements, alone or in combination with other language, to identify or describe NCQA.

Descriptions of NCQA

- NCQA is an independent, not-for-profit organization dedicated to improving health care quality.
- NCQA is an independent, not-for-profit organization dedicated to assessing and reporting on the quality of health plans, managed behavioral healthcare organizations, preferred provider organizations, physician organizations, credentials verification organizations, disease management programs and other health-related programs.
- NCQA is committed to providing information on the quality of health plans. Consumers can access information on NCQA or on health care quality on NCQA’s Web site at www.ncqa.org, or by calling NCQA’s Customer Support at 888-275-7585.
- NCQA is governed by a board of directors that includes employers, consumer and labor representatives, health plans, quality experts, regulators and representatives from organized medicine.
- NCQA’s mission is to improve the quality of health care.

CAHPS PCMH Surveys

- Developed jointly by the Agency for Healthcare Research and Quality (AHRQ), NCQA and the Commonwealth Fund, the CAHPS® Patient Centered Medical Home (PCMH) Survey is the most comprehensive tool available for assessing consumer experiences with clinician practices.
- CAHPS® provides consumers, purchasers and practices with information about a broad range of key consumer issues, such as overall satisfaction, average wait times, physician availability, obstacles to receiving care and parents’ impressions of their children’s care.
- NCQA’s Survey Vendor program was developed to ensure standardization of data collection; thus, results from consumer experiences are comparable across practices. To become an NCQA-Certified CAHPS PCMH Survey Vendor, an organization must demonstrate that it has the capabilities, experience, and expert personnel to accurately administer the CAHPS survey.
Implementation of the HEDIS CAHPS Patient-Centered Medical Home Survey

NCQA Trademarks

HEDIS®
The Healthcare Effectiveness Data and Information Set (HEDIS®) is a registered trademark of NCQA. The registered trademark symbol should be applied directly after the word “HEDIS.” The organization need only apply the trademark to the first reference of the term “HEDIS” within the written material.

A footnote stating, “HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA),” should be placed at the bottom of the page where the registered trademark first appears.

Quality Compass®
Quality Compass is a registered trademark of NCQA. The registered trademark symbol should be applied directly after the word “Compass.” The organization need only apply the trademark to the first reference of the term “Quality Compass” within the written material.

A footnote stating, “Quality Compass® is a registered trademark of the National Committee for Quality Assurance (NCQA),” should be placed at the bottom of the page where the registered trademark first appears.

NCQA HEDIS Compliance Audit™
NCQA HEDIS Compliance Audit™ is a trademark of NCQA. The trademark symbol should be applied directly after the word “Audit.” The organization need only apply the trademark to the first reference of the term “NCQA HEDIS Compliance Audit” within the written material.

A footnote stating, “NCQA HEDIS® Compliance Audit™ is a trademark of the National Committee for Quality Assurance (NCQA),” should be placed at the bottom of the page where the trademark first appears.

CAHPS®
CAHPS® is a registered trademark of the Agency for Healthcare Research and Quality (AHRQ). The registered trademark symbol should be applied directly after the word “CAHPS®.” The organization need only apply the trademark to the first reference of the term “CAHPS” within the written material.

A footnote stating, “CAHPS® is a registered trademark of the Agency for Healthcare Research and Quality (AHRQ),” should be placed at the bottom of the page where the trademark first appears.

Describing NCQA Data in a Press Release

All of the preceding rules apply to press releases. Organizations may create press releases announcing their NCQA Certification status. Press releases should include a description of the survey from the language above and NCQA boilerplate language:

NCQA is a private, non-profit organization dedicated to improving health care quality. NCQA accredits and certifies a wide range of health care organizations. It also recognizes clinicians and practices in key areas of performance. NCQA is committed to providing health care quality information for consumers, purchasers, health care providers and researchers.

Contact communications@ncqa.org if you have questions about press releases.
Compliance
Organizations must follow and conform to all applicable NCQA Marketing and Advertising Guidelines. Information referencing NCQA status or products must be accurate and must not be misleading. Only the organization that earned NCQA Certification may advertise the status and use the corresponding seal; affiliates, including delegated entities, contractors and partners, may not use the NCQA status and seal. Failure to comply with these guidelines may jeopardize certification status.

NCQA conducts periodic audits of marketing and advertising materials to ensure that they are true and are not misleading, and that NCQA status is represented correctly. Failure to participate in an NCQA audit or refusal to comply with NCQA’s request to address inaccuracies in information related to NCQA, to NCQA status or to the product in marketing and advertising materials is a violation of NCQA’s advertising guidelines and may result in revocation of NCQA status.

Organizations must maintain all copies of marketing and advertising materials referencing NCQA status and products released from September 15 of each year until December 31 of the following year (i.e., for a period of 15½ months).

NCQA reserves the right to require an organization to withdraw its advertising materials from distribution immediately or to publish, at the organization’s cost, a retraction or clarification in connection with any false or misleading statements or any violation of applicable NCQA marketing and advertising guidelines. Organizations agree in advance to remedy violations with action deemed appropriate by NCQA.

Special Situations
These guidelines may not address all potential marketing and advertising materials. In such instances, contact the NCQA Marketing Department at marketing@ncqa.org.

NCQA will respond to complaints regarding inaccurate or misleading advertising materials by customers and their affiliates. Complaints may initiate an audit of an organization’s materials outside the regular audit process.

Thank you for observing these guidelines. If you have questions, please contact NCQA at marketing@ncqa.org.
