Episode 1: The Basics
(July 12, 2019)

Episode 2: Answering
Common Questions
(September 27, 2019)

Episode 3: Let's Get Technical –
Digital Measures & ECDS
(October 30, 2019)

Why change HEDIS, and why now?

Health care environment

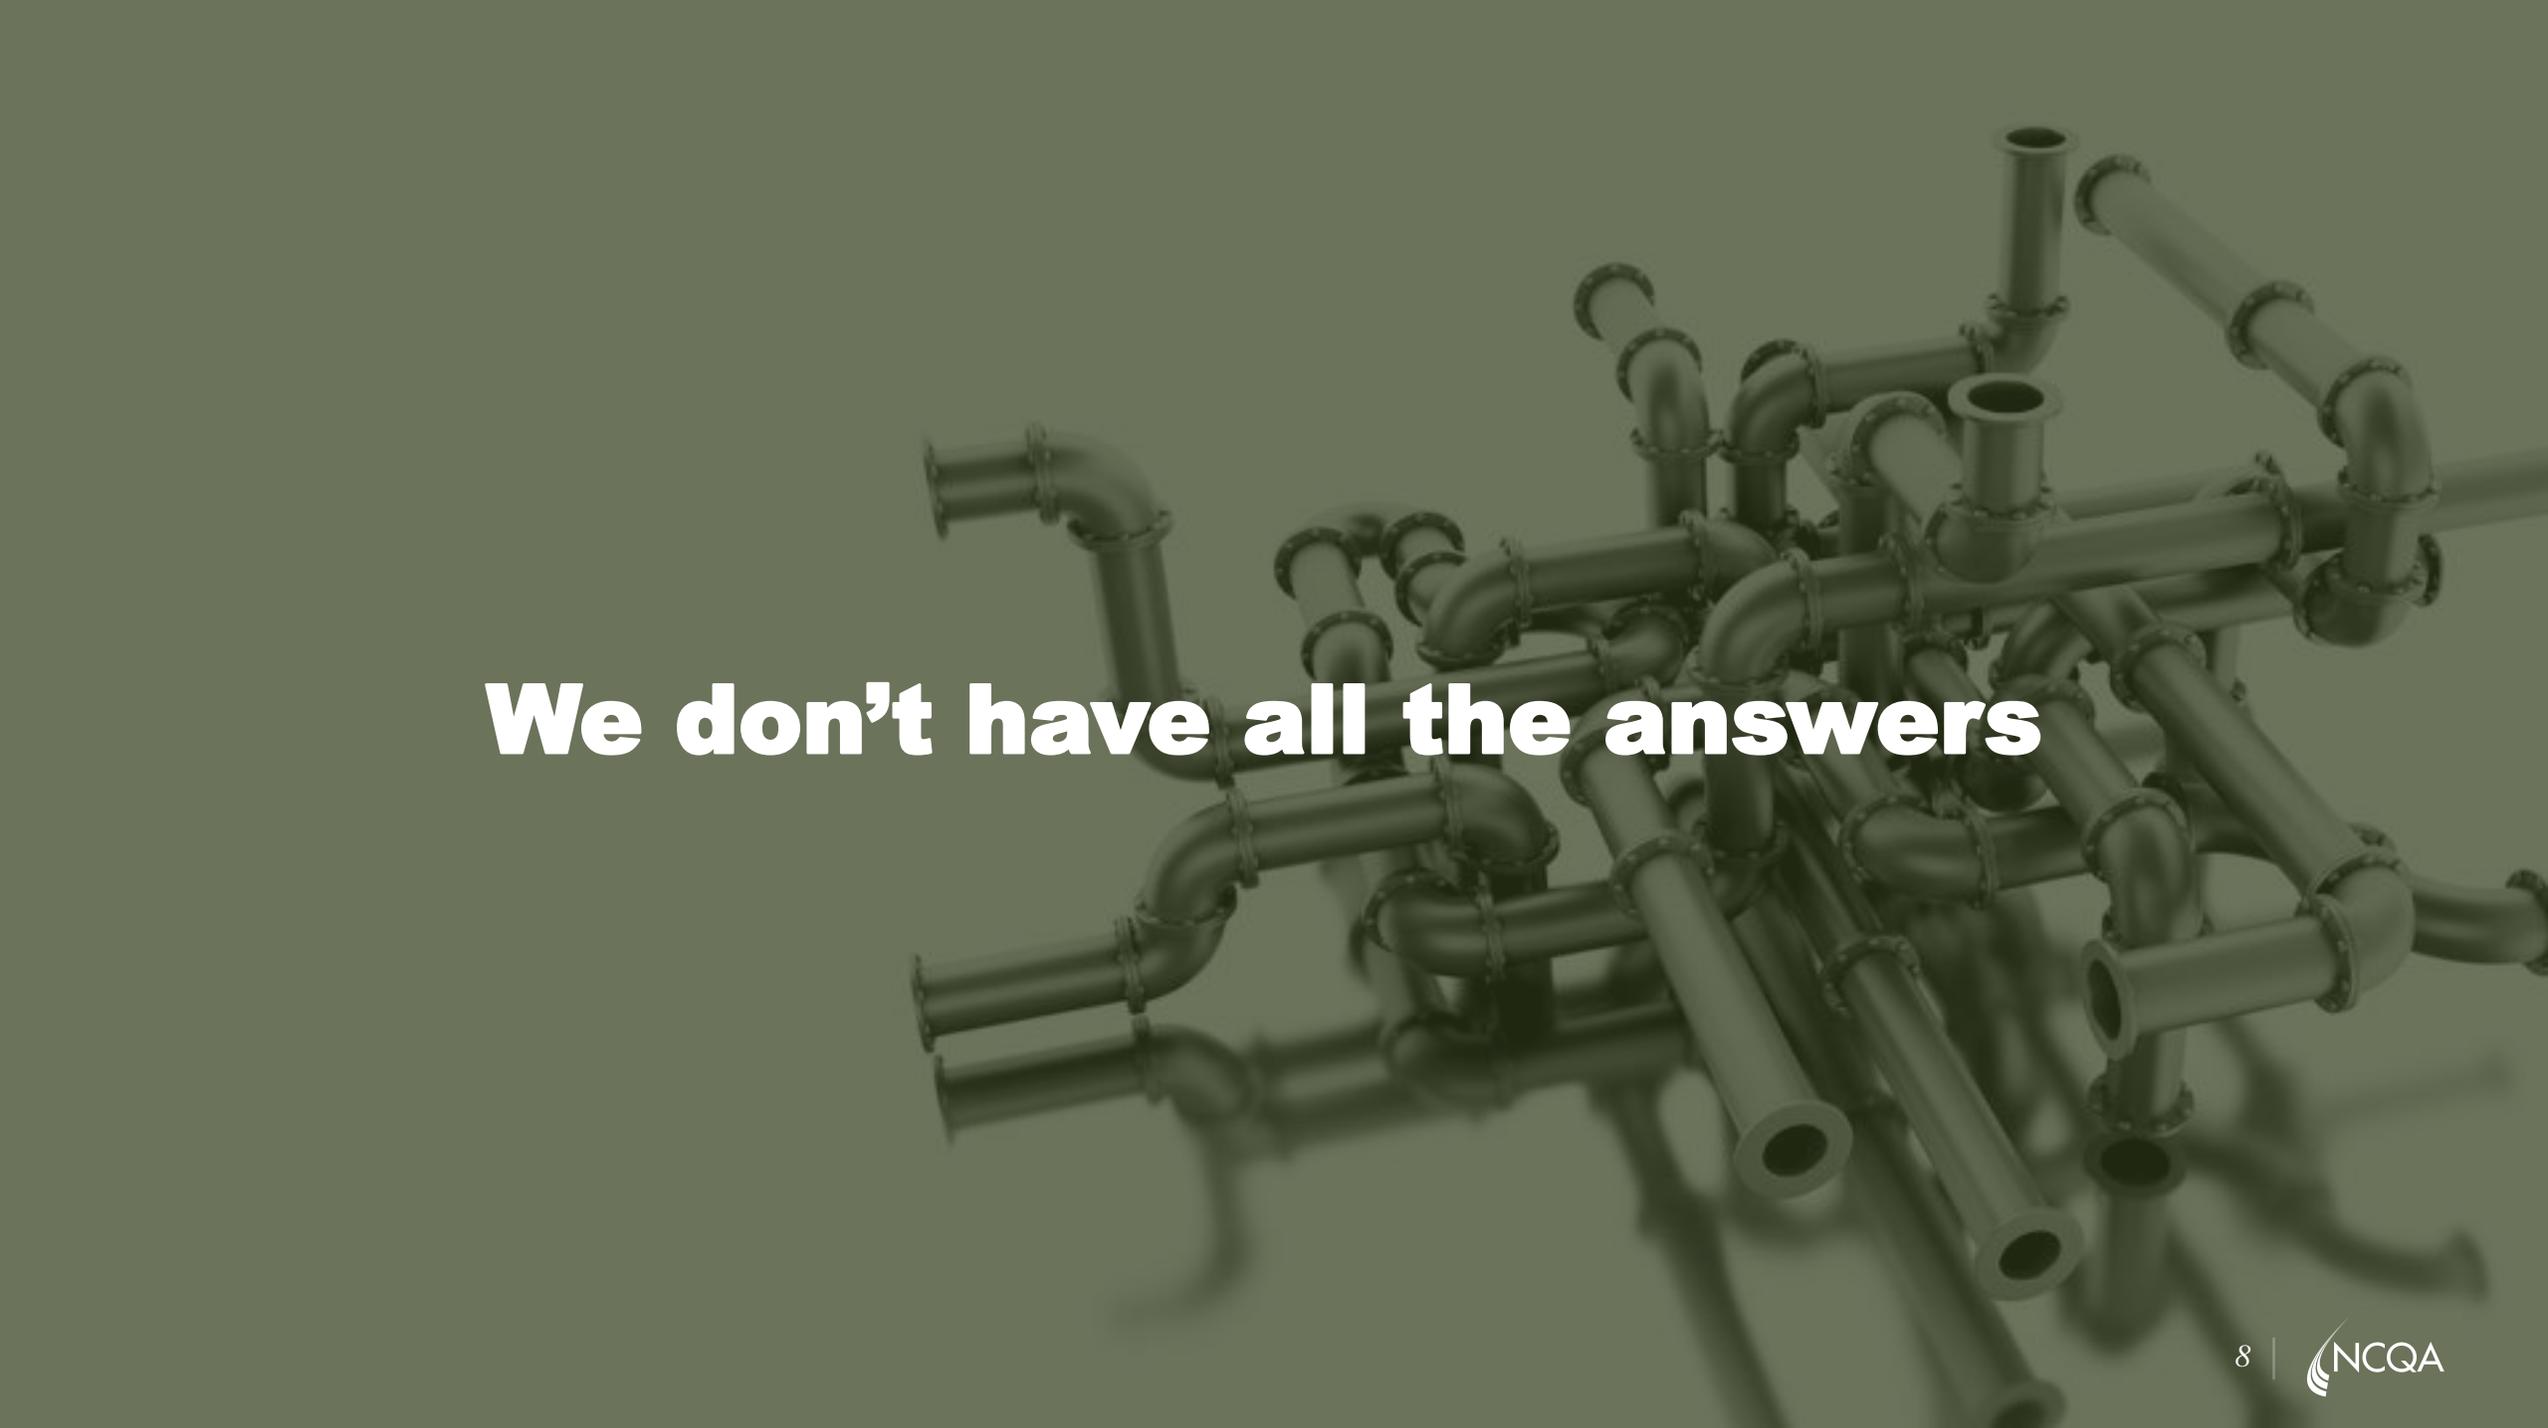

Feedback

Market research

What's the purpose?

Improve utility of HEDIS

Maintain integrity of measures
throughout the system

We don't have all the answers

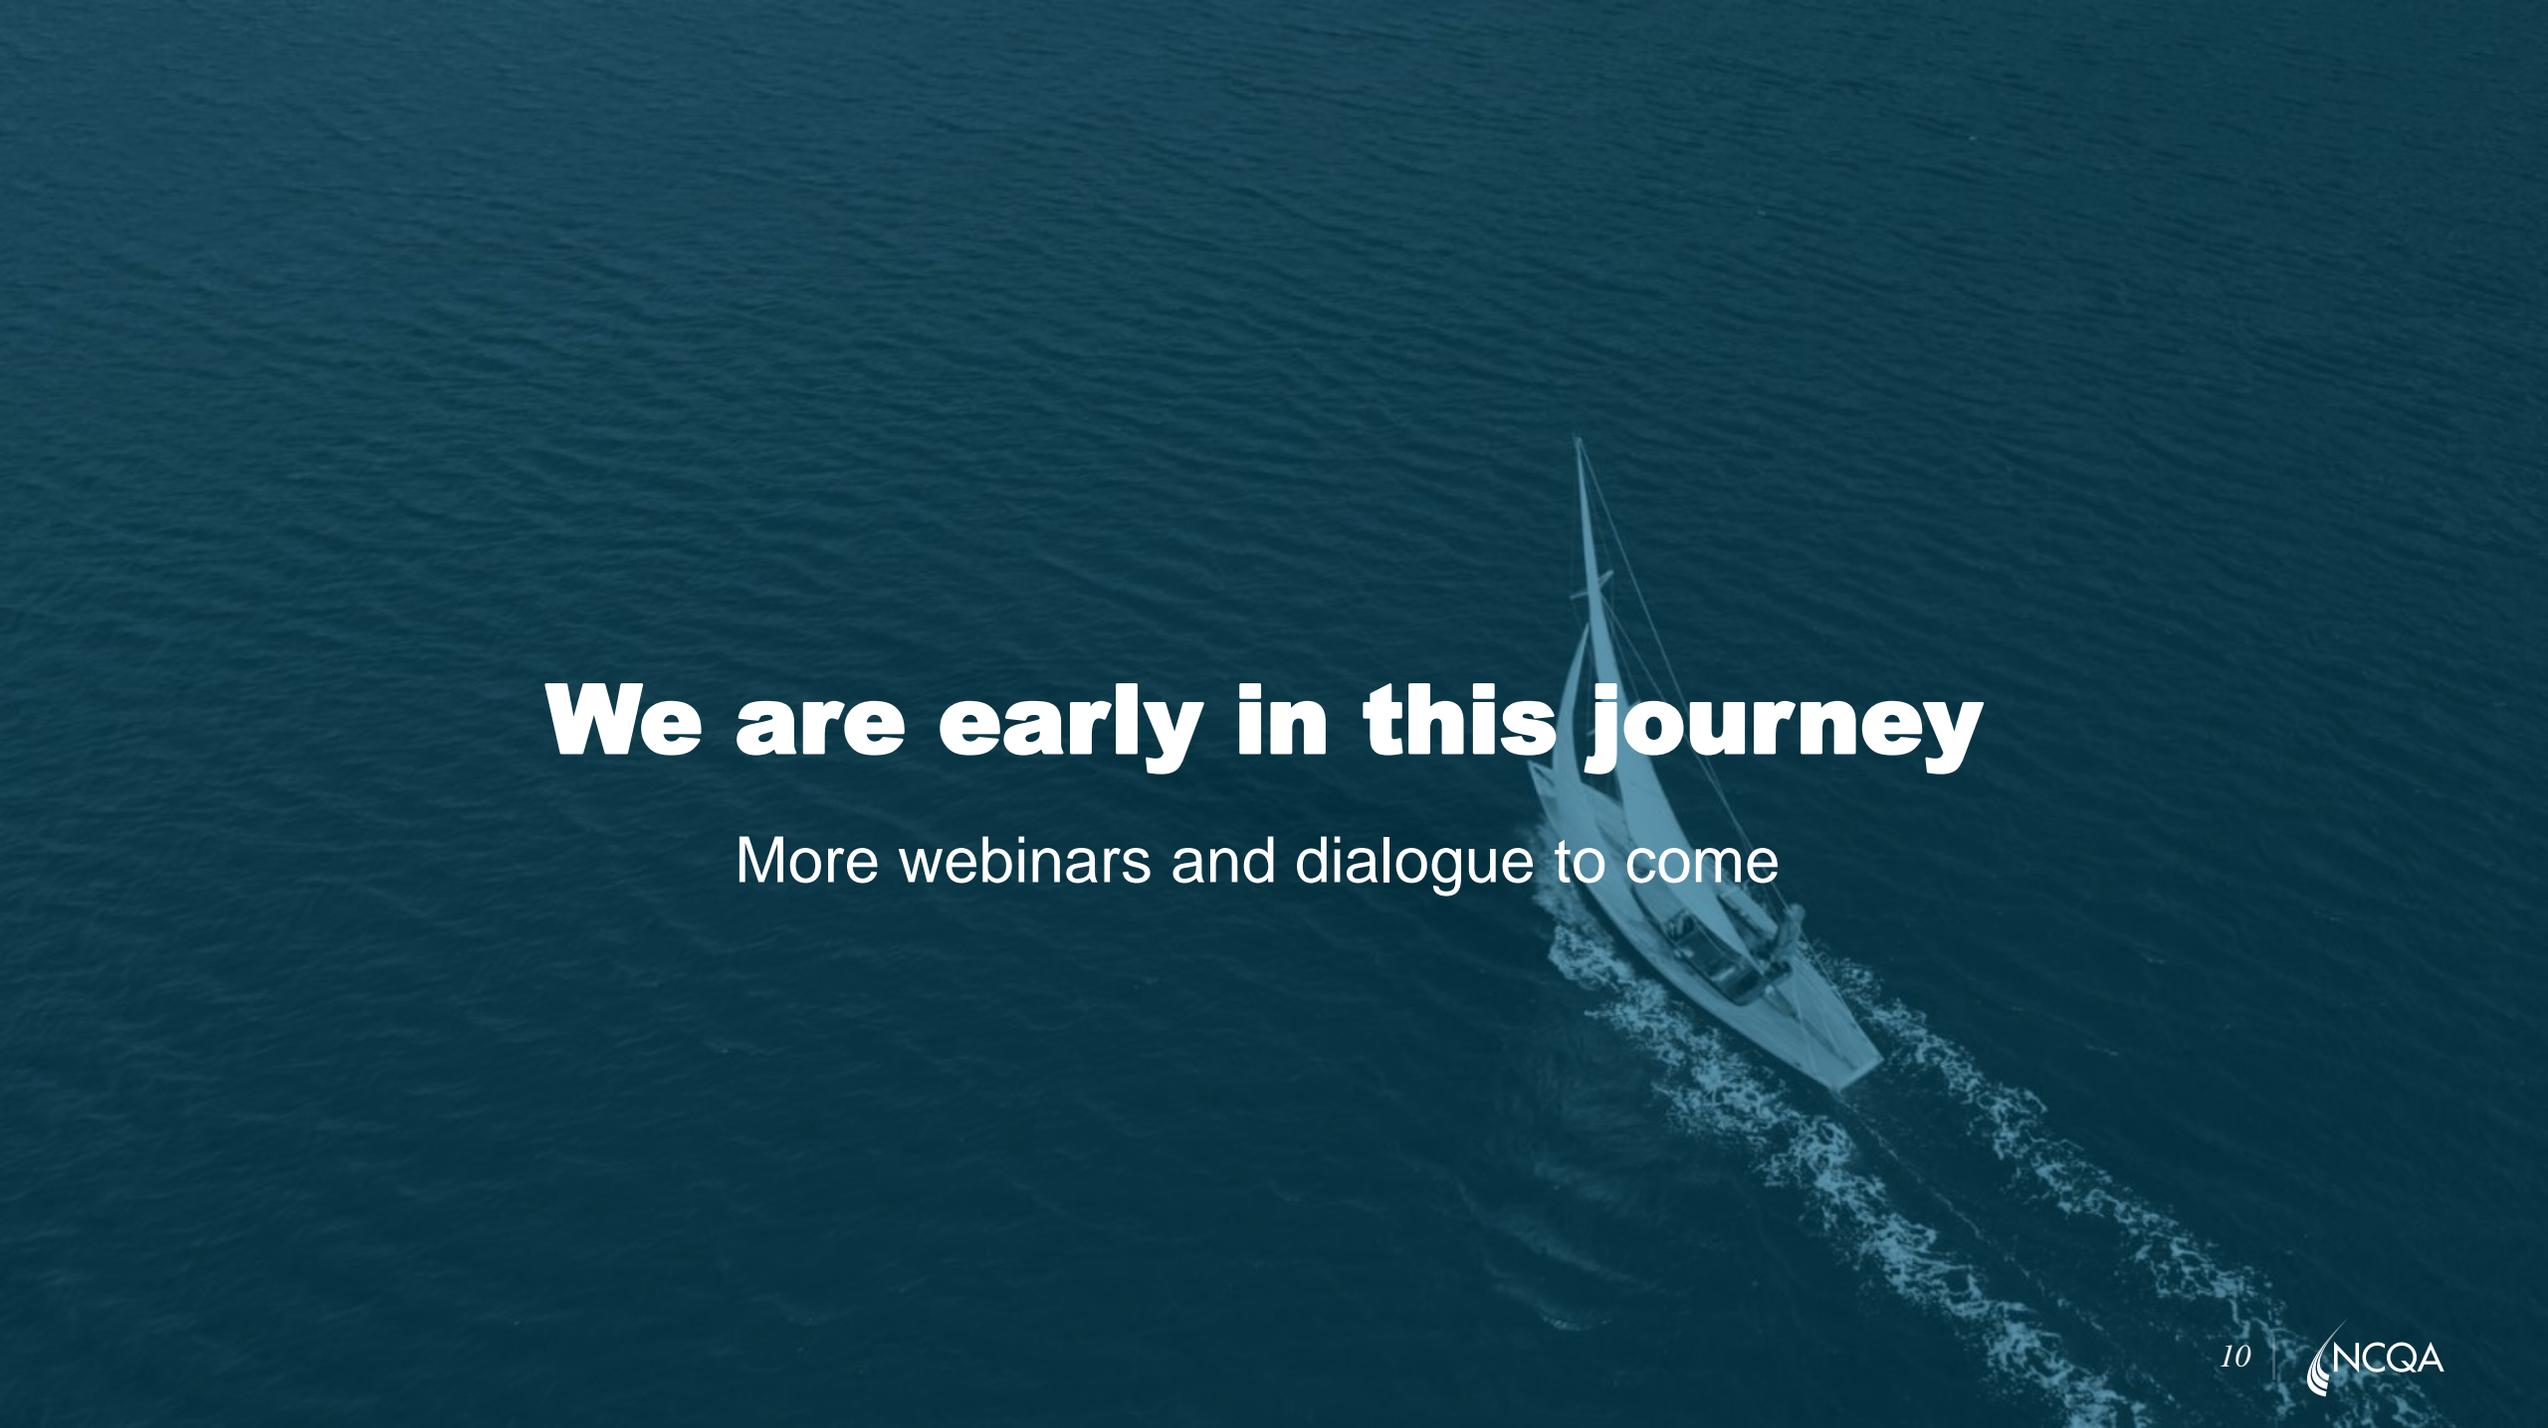

Changes will be gradual

A process, not an event

Collaboration, not commands

Readiness varies, so the pace will vary

An aerial photograph of a sailboat on a dark blue sea. The boat is moving from the upper right towards the lower left, leaving a white wake behind it. The water has a fine, textured pattern of ripples.

We are early in this journey

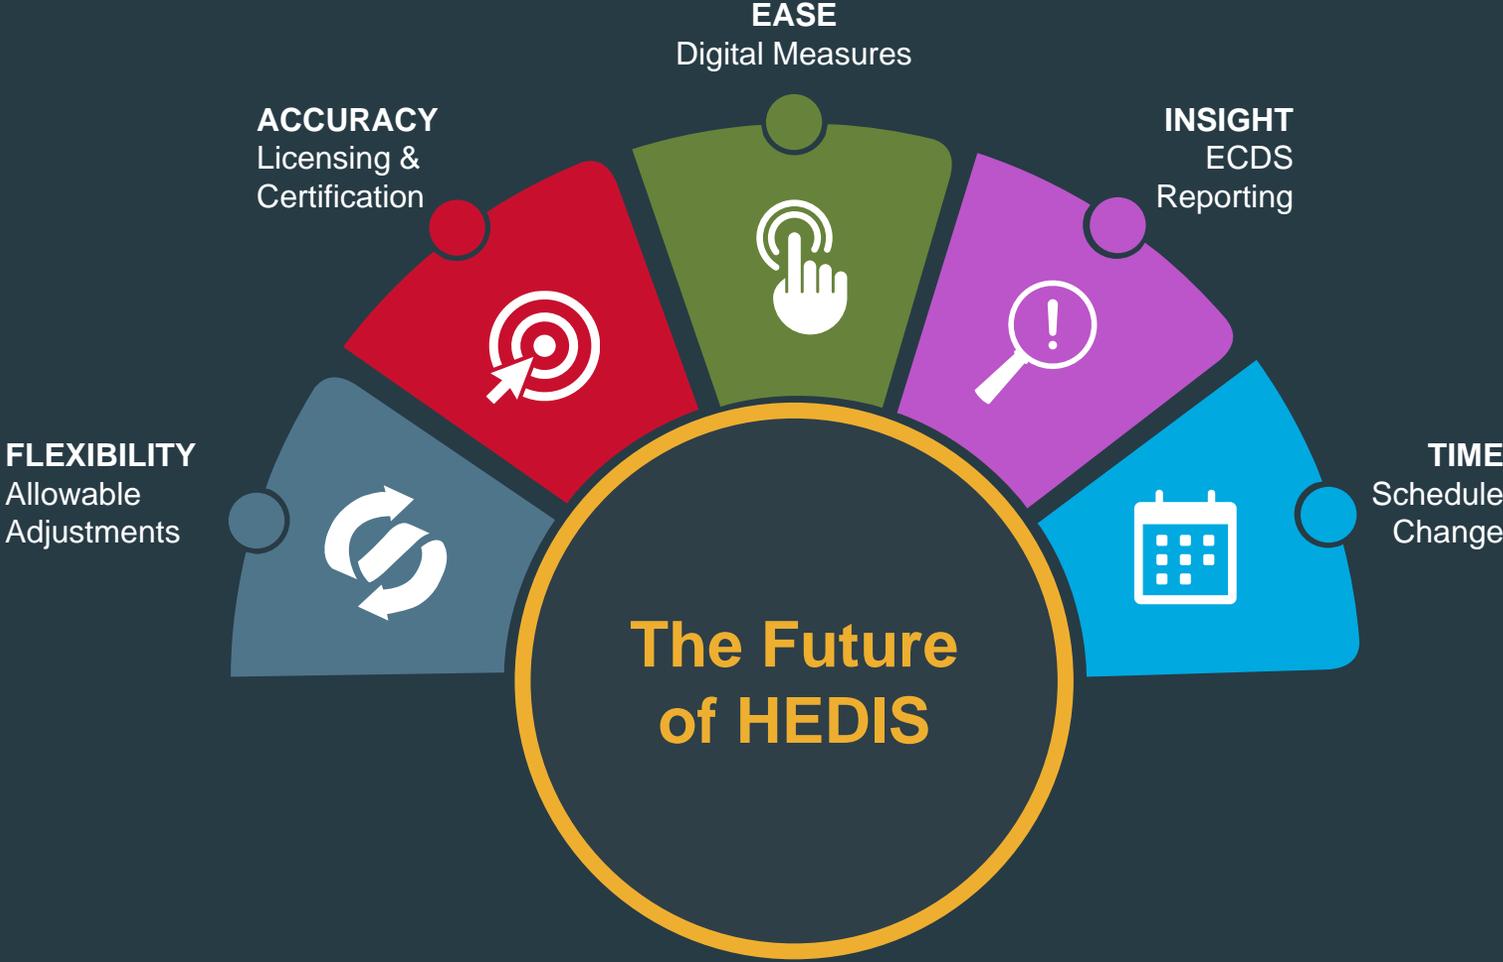

More webinars and dialogue to come

5 Core Topics

“Infrastructure”
How HEDIS works

NOT

Content
What HEDIS measures

Allowable Adjustments

What? “What’s the vision?”

Adjust measures

Keep clinical intent

Use HEDIS at different levels of system

Allowable Adjustments

So What? “Why should I care?”

Customize *correctly*

Study gaps in care

Reduce burden

Allowable Adjustments

Now What? “What’s my next step?”

Consider how you use or want to adjust our measures

Read what’s allowable
(end of Vol. 2
measure sections)

Contact MyNCQA

Licensing & Certification

What? “What’s the vision?”

All HEDIS users need
a license agreement

Commercial services based on
HEDIS also need certification

Licensing & Certification

So What? “Why should I care?”

Accuracy, reliability

Trust in value-based payments

Apples-to-apples comparability

Licensing & Certification

Now What? “What’s my next step?”

How do you use HEDIS?

Commercial Users:
MyNCQA> Ask a Question>Orders>
Custom License Agreement

Digital Measures

What? “What’s the vision?”

Digitalized versions of *existing* measures that use *traditional reporting*

Measures written as computer code (machine-readable)

Download measures directly

Digital Measures

So What? “Why should I care?”

Easier transfer of measures
into your IT system

Reduce interpretation,
recoding, human error

Standardize to ease use
across care continuum

Digital Measures

So What? “Why should I care?”

Our most-viewed video of 2019: “An Introduction to Digital Measures”

Digital Measures

Now What? “What’s my next step?”

Take our real-time survey

ECDS Reporting

What? “What’s the vision?”

A type of digital measure

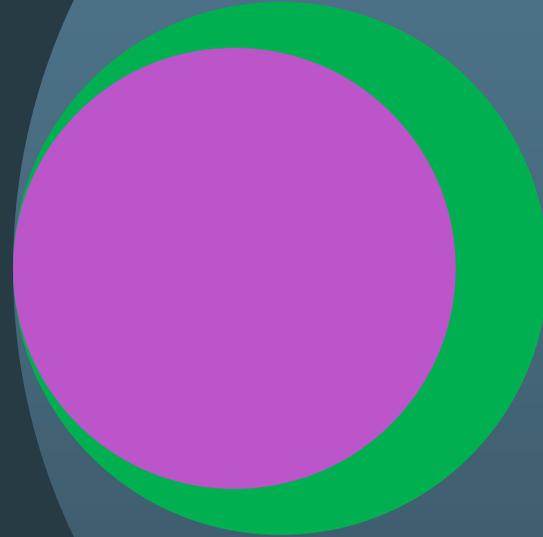

Report clinical data according
to data source

ECDS Reporting

What? "What's the vision?"

ECDS / 11

HEDIS / 88
non-survey measures

DIGITAL / 19

ECDS Reporting

So What? “Why should I care?”

Leverages more and better data
into greater insight

Fosters patient-centered care

ECDS Reporting

Now What? “What’s my next step?”

Order ECDS measures:
(store.ncqa.org/ECDS)

Report ECDS measures

Share experiences about
ECDS reporting

***First ECDS measure
to be **publicly reported*****

Prenatal Immunization Status

HEDIS MEASUREMENT YEAR 2020
(Reported **June 2021**)

ECDS Reporting

Now What? "What's my next step?"

Health Plan Report Card will highlight ECDS-reporting plans.

The screenshot shows the NCQA Health Plan Report Card interface. At the top, the NCQA logo is on the left, and navigation links for "Shop Our Products", "Contact Us", and "Log in" are on the right. Below the logo, there are links for "Our Programs", "HEDIS", "Report Cards", "Education & Training", and "About NCQA". A red navigation bar contains "REPORT CARDS" and sub-categories: "Health Plans", "Providers", "Practices", and "Other Health Care Organizations". On the right of this bar are links for "Get More Data", "Methodology", and "My Saved".

The main content area is titled "Health Plans" with a sub-note: "Last update: 08/15/19. Ratings are updated annually (September)." Below this is a "Refine By" section with a red circle around the "ELECTRONIC CLINICAL DATA" filter. Underneath, the "ECDS (50)" filter is selected and also circled in red.

To the right is a table of health plans. The second row is circled in red, and a tooltip is shown over the ECDS icon. The tooltip text is "ECDS Tooltip for icon's definition." The table rows are as follows:

Health Plan Name	Rating	Accreditation
Example Health Insurance Plan also known as "Example Plan"	★★★★☆	Accredited
Example Health Insurance Plan	★★★★☆	Not Accredited
Health plan example name	★★★★☆	Accredited
Example Health Insurance Plan	★★★★☆	Not Accredited

Schedule Change

What? “What’s the vision?”

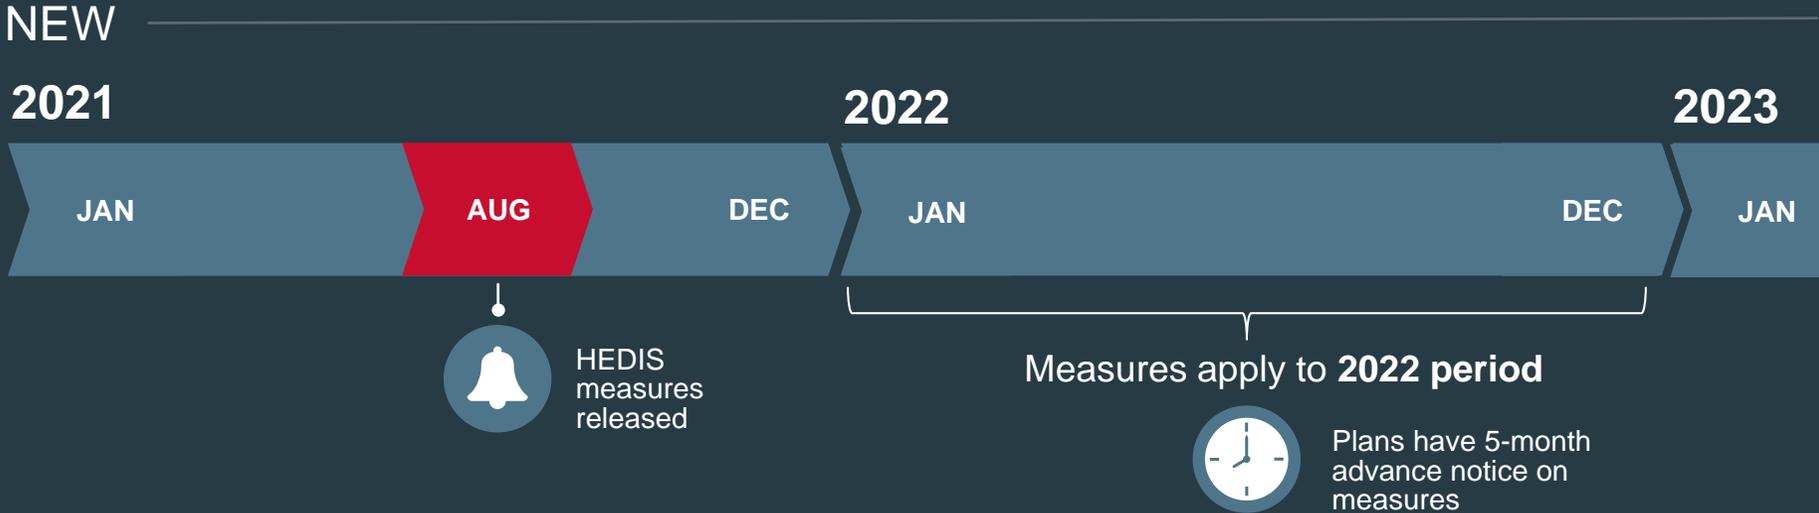

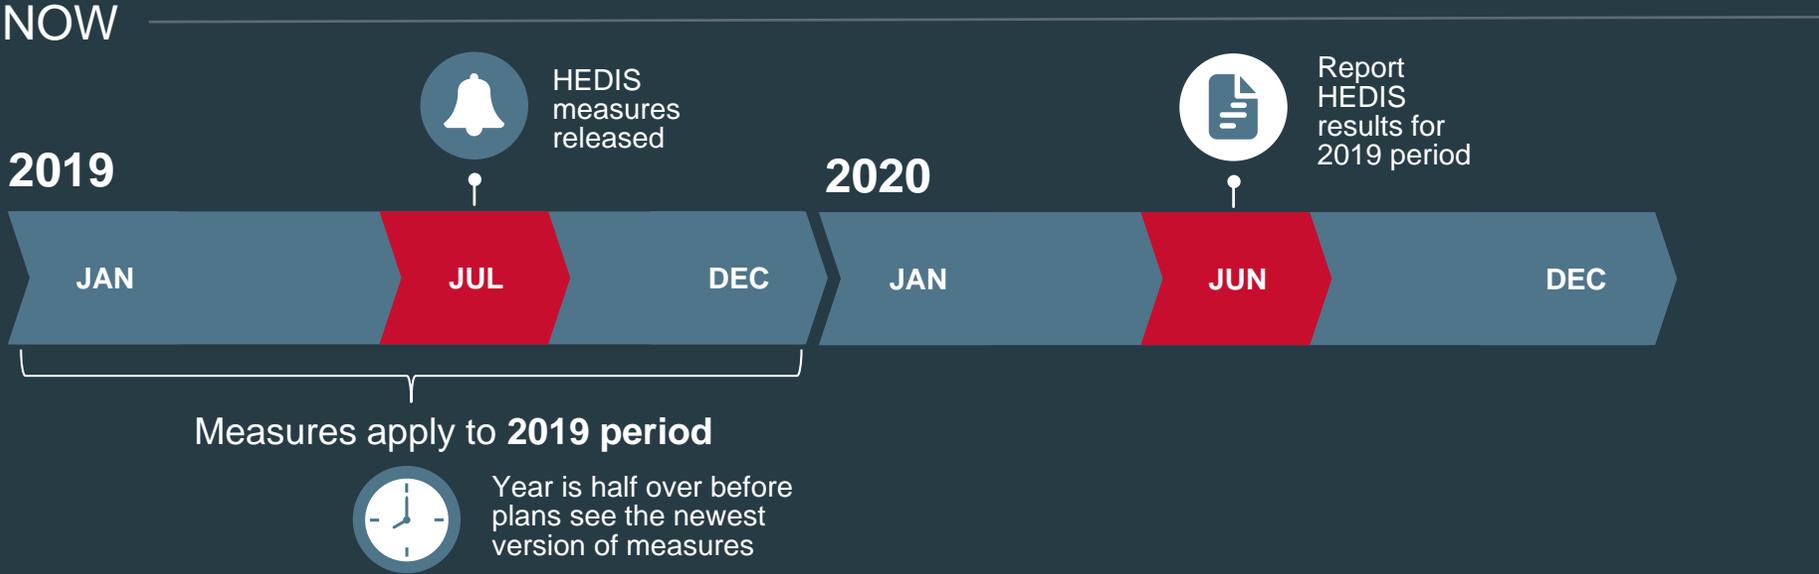

Current: 6-month lag
(Jan-Dec measures = July notice)

Future: 5-month head start
(Jan-Dec measures = *prior* Aug notice)

Schedule Change

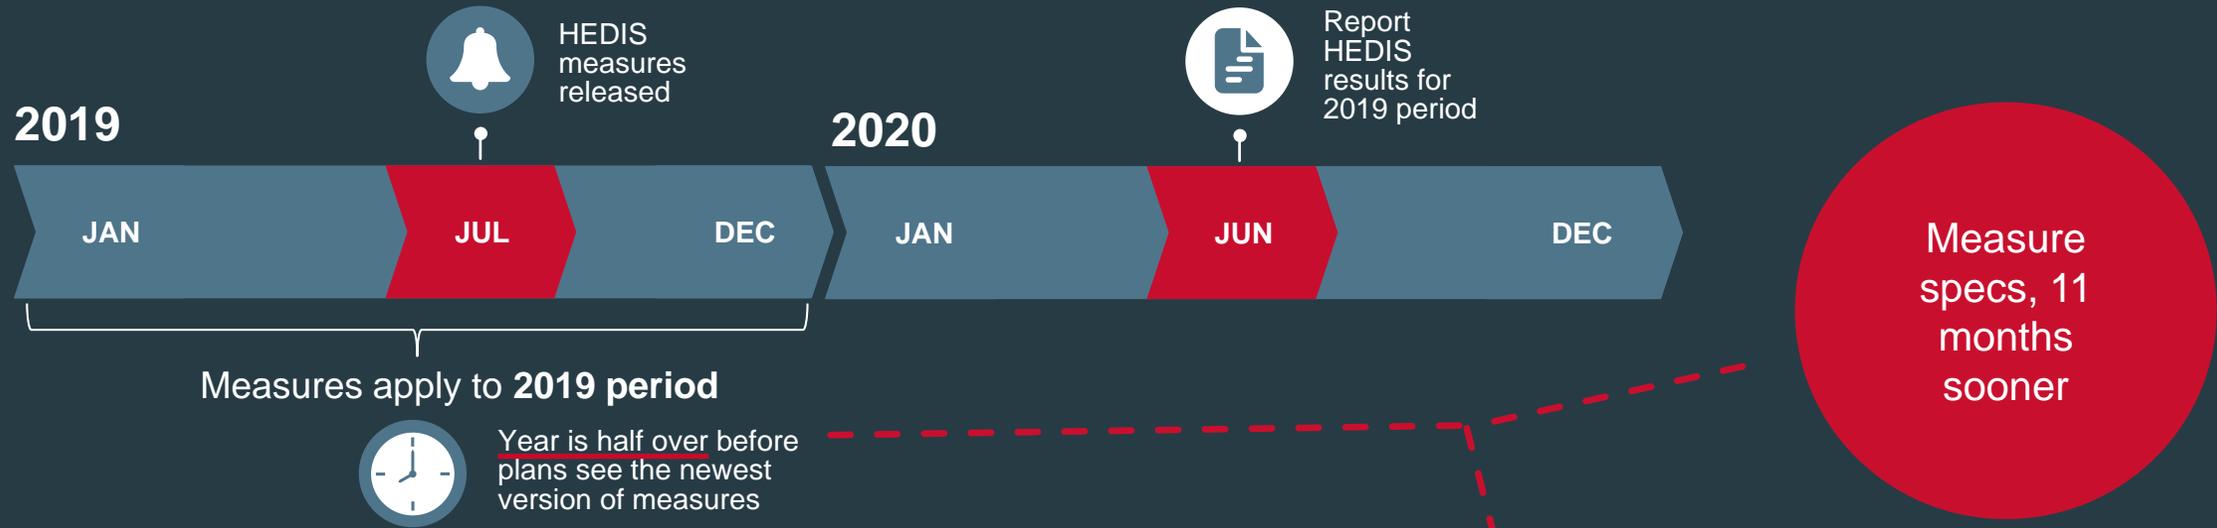

So What? "Why should I care?"

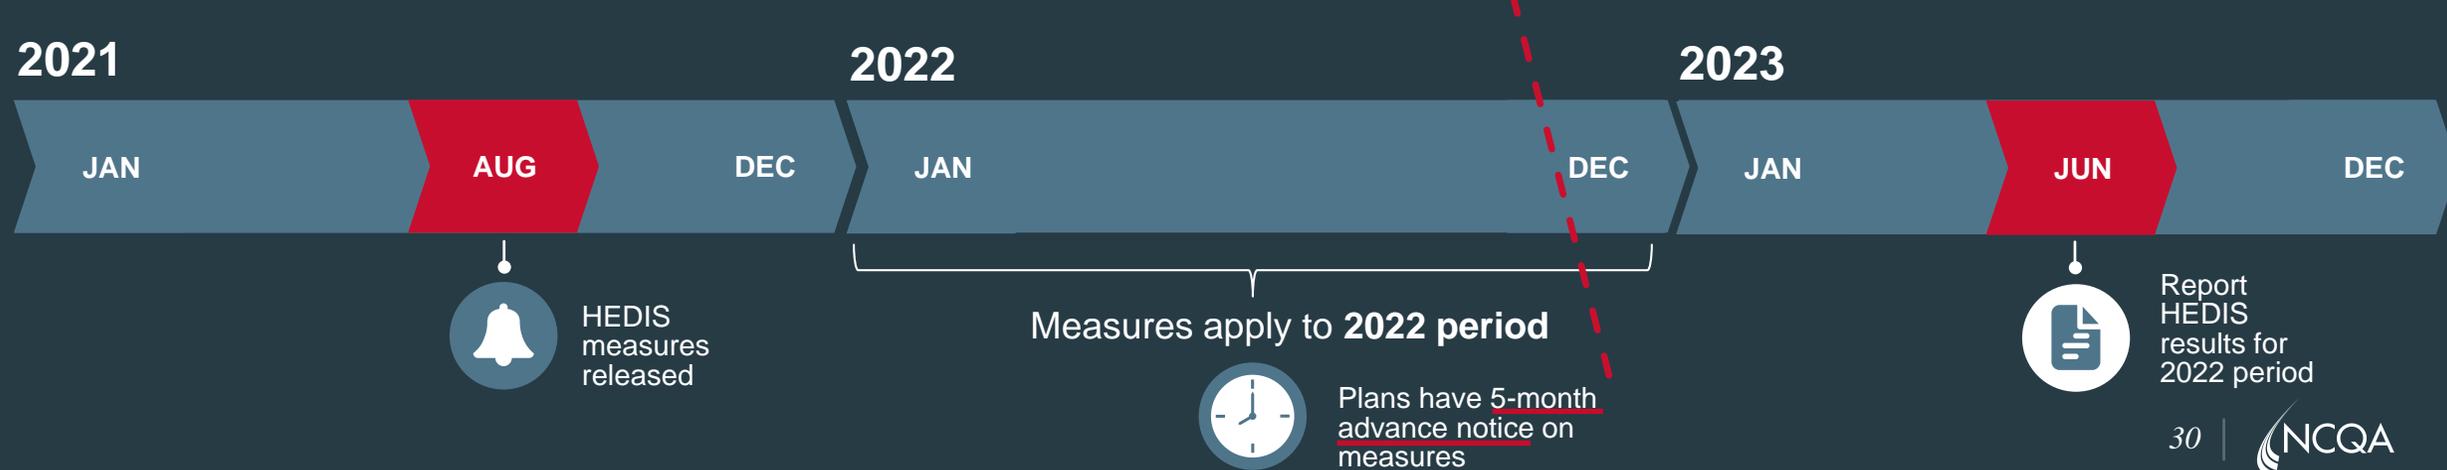

Schedule Change

So What? "Why should I care?"

NOW

NEW

Schedule Change

Now What? “What’s the next step?”

A related simplification: the HEDIS naming convention.

What’s the difference?

Why so many?

Schedule Change

Now What? “What’s the next step?”

Transition Year: Two HEDIS editions coming July 1, 2020.

Learning Collaboratives with ECDS

Implementation of Measures and Quality Improvement

Alcohol Learning Collaborative

(2017-2020)

Funded by the Centers for Disease Control and Prevention & Substance Abuse and Mental Health Services Administration

Participants: EmblemHealth (NY), GOBHI (OR), S. CA Kaiser Permanente (CA)

NCINQ Adolescent Depression Collaborative

(2018-2020)

Funded by the Agency for Healthcare Research and Quality & CMS

Participants: Affinity (NY), Excellus BCBS (NY), GOBHI (OR), CenCal (CA), AmeriHealth Caritas (DC)

Learning Collaborative Target Measures

Unhealthy Alcohol Use Screening
and Follow-Up

Depression Screening and Follow-
Up for Adolescents and Adults

Utilization of the PHQ-9 to Monitor
Depression Symptoms for
Adolescents and Adults

Depression Remission or Response
for Adolescents and Adults

Electronic Clinical Data Systems

Plans collect data from various sources to accurately assess performance.

Clinical data may be captured in electronic health records, health information exchanges, clinical registries, case management records and administrative claims.

What have we learned?

Key facilitators and barriers to improving behavioral health ECDS measures

Which Interventions have Plans Found to be Helpful?

Strategies for Improvement

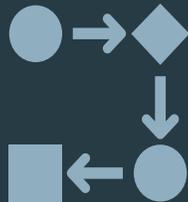

Access to Data

- Leverage health information exchanges
- Incentivize provider reporting
- Partner with provider groups to exchange data
- Incorporate LOINC codes into provider EHRs
- Work with data vendors

Increase Screening

- Educate providers on use of standardized tools and coding terminology
- Incorporate screenings into clinical workflow
- Use apps to engage patients

Follow-Up and Management

- Educate and train providers on evidence based care
- Develop workflows for follow-up/management
- Outreach to members with positive screening and/or diagnosis
- Utilize case management resources

Accessing Clinical Data for HEDIS Reporting

Learning from the experiences of AmeriHealth Caritas District of Columbia

- Began effort ~5 years ago with collection of supplemental data from EHRs of two large Federally Qualified Health Centers
- With focus on depression ECDS measures also explored getting clinical data from internal case management programs and health information exchanges
- Findings:
 - Focus on practices/exchanges where the bulk of plan membership is represented
 - Incorporate data exchange with practices into value-based payment arrangements
 - Transform manual data collection processes into automatic feeds
 - Provide relevant data back to clinicians (e.g., provider portal)

What's Ahead for 2020

Collecting and Reporting Measures

- Reporting the behavioral health ECDS measures for HEDIS 2020

Quality Improvement Resources/Tools

- Develop guide for reporting ECDS measures:
 - Addressing barriers/challenges
 - Using data collection tools
 - Balancing & interim measures to track performance
- Identify best practices and resources for improving care
- Case studies describing successful changes

7 Principles

(per NCQA-CMS/ONC discussions)

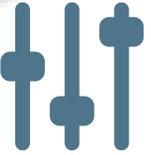

1

Minimize Reporting Burden

- Use data generated in the course of planning, delivering, or paying for care
- Use common measures across programs
- Use common measure set for all providers

2

Strengthen Data's Scope, Quality and Validity

- Use data from all suitable sources, not just payers and providers
- Independently verify data quality and validity to provide info on issues and gaps
- Strengthen knowledge generated using the most granular information possible
- Assess all sites and care types (in part by being person-centric)

Establish National Systems and Data Infrastructure

- Maximize health IT and computable data's potential to help providers improve
- Create timely point-of-care decision support based on data from many sources
- Provide community- or region-level infrastructure and support

4

Ensure Clinical Soundness

- Align with clinical guidelines that advance quality measurement to a continuous cycle of information supporting QI
- Preserve meaningful comparison and quantifiable progress as guidelines evolve
- Aid improvement through continuous measurement, intervention, assessment

5

Ensure Fairness

- Avoid disadvantaging providers or patient populations
- Create a more inclusive QI approach that accommodates all people and groups
- Standardize risk adjustment for populations
- Determine population-level risk adjustment and stratification one measure at a time
- Make measurement methods, data sources and results transparent

6

Align with Societal Goals

- Select measures for impact on cost, quality, social determinants, equity and wellbeing
- Prioritize measures by anticipated benefit (value = resources used/projected benefit)
- Incentivize care for complex patients based on shared savings and improving health, not on benchmarks that complex patients cannot reach
- Separate patient characteristics from provider performance to avoid cherry-picking

7

Provide Timely and Targeted Analysis and Feedback

- Build benchmarks cautiously and include statistical results
- Provide fast, actionable information from CQMs

Digital Measurement Community

Digital Measurement Community

Coming Soon!

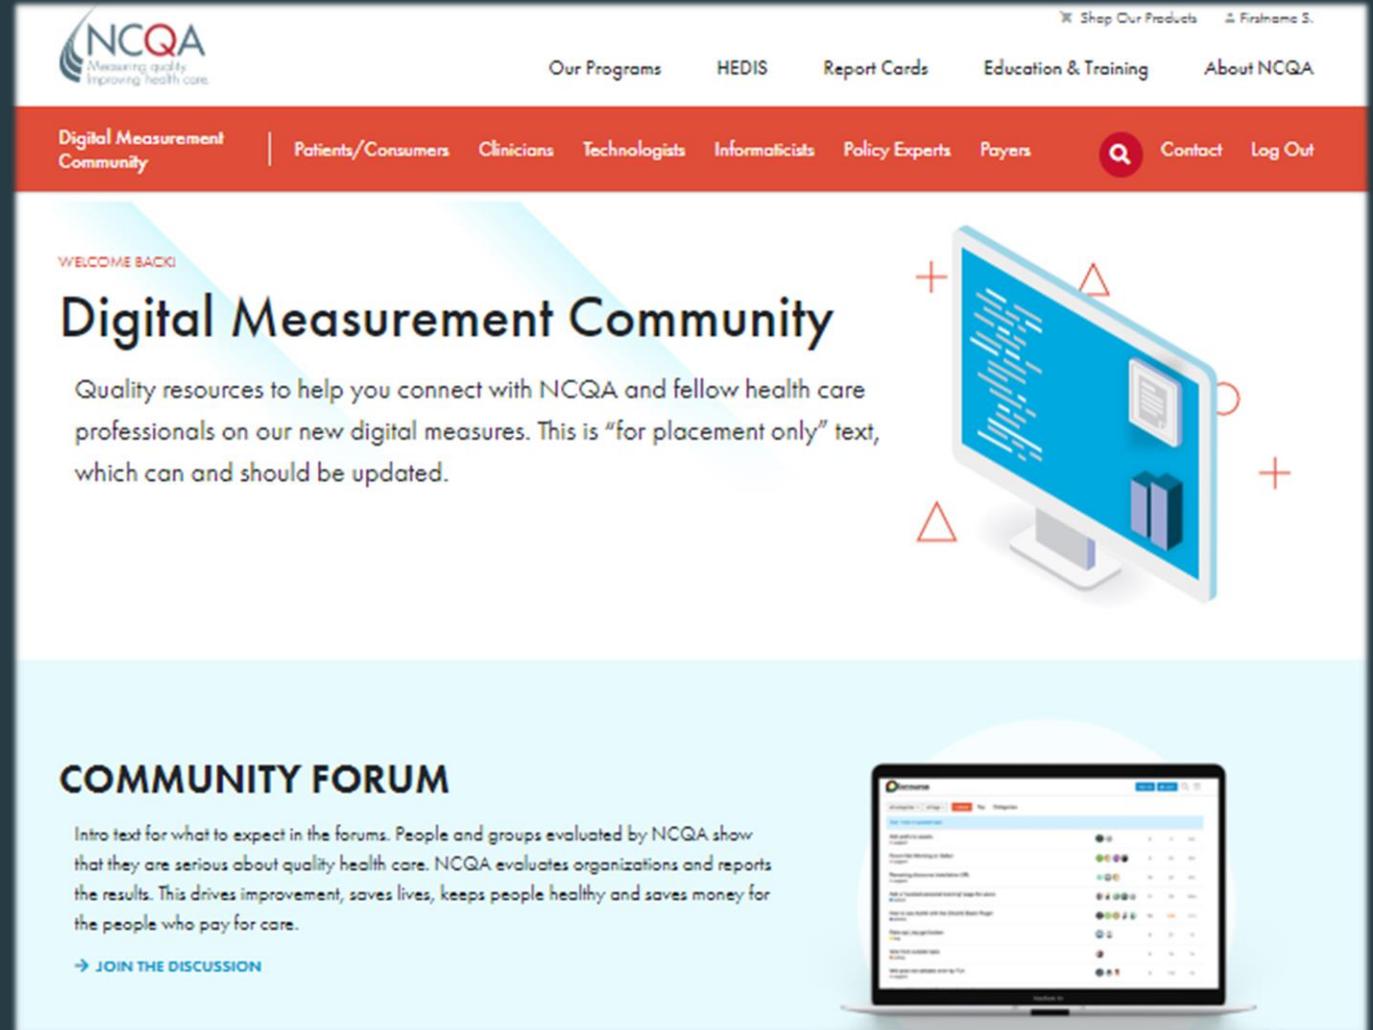

A **NEW** interactive platform for stakeholders engaged in the development and implementation of digital quality measures

To sign up, visit:

[*www.ncqa.org/dmc*](http://www.ncqa.org/dmc)

or email

[*digital.measures@ncqa.org*](mailto:digital.measures@ncqa.org)

A New Interactive Digital Measurement Community

Addressing Knowledge Barriers and Lack of Coordination Across Disciplines

The Digital Measurement Community will foster collaboration around three primary areas of high impact and value:

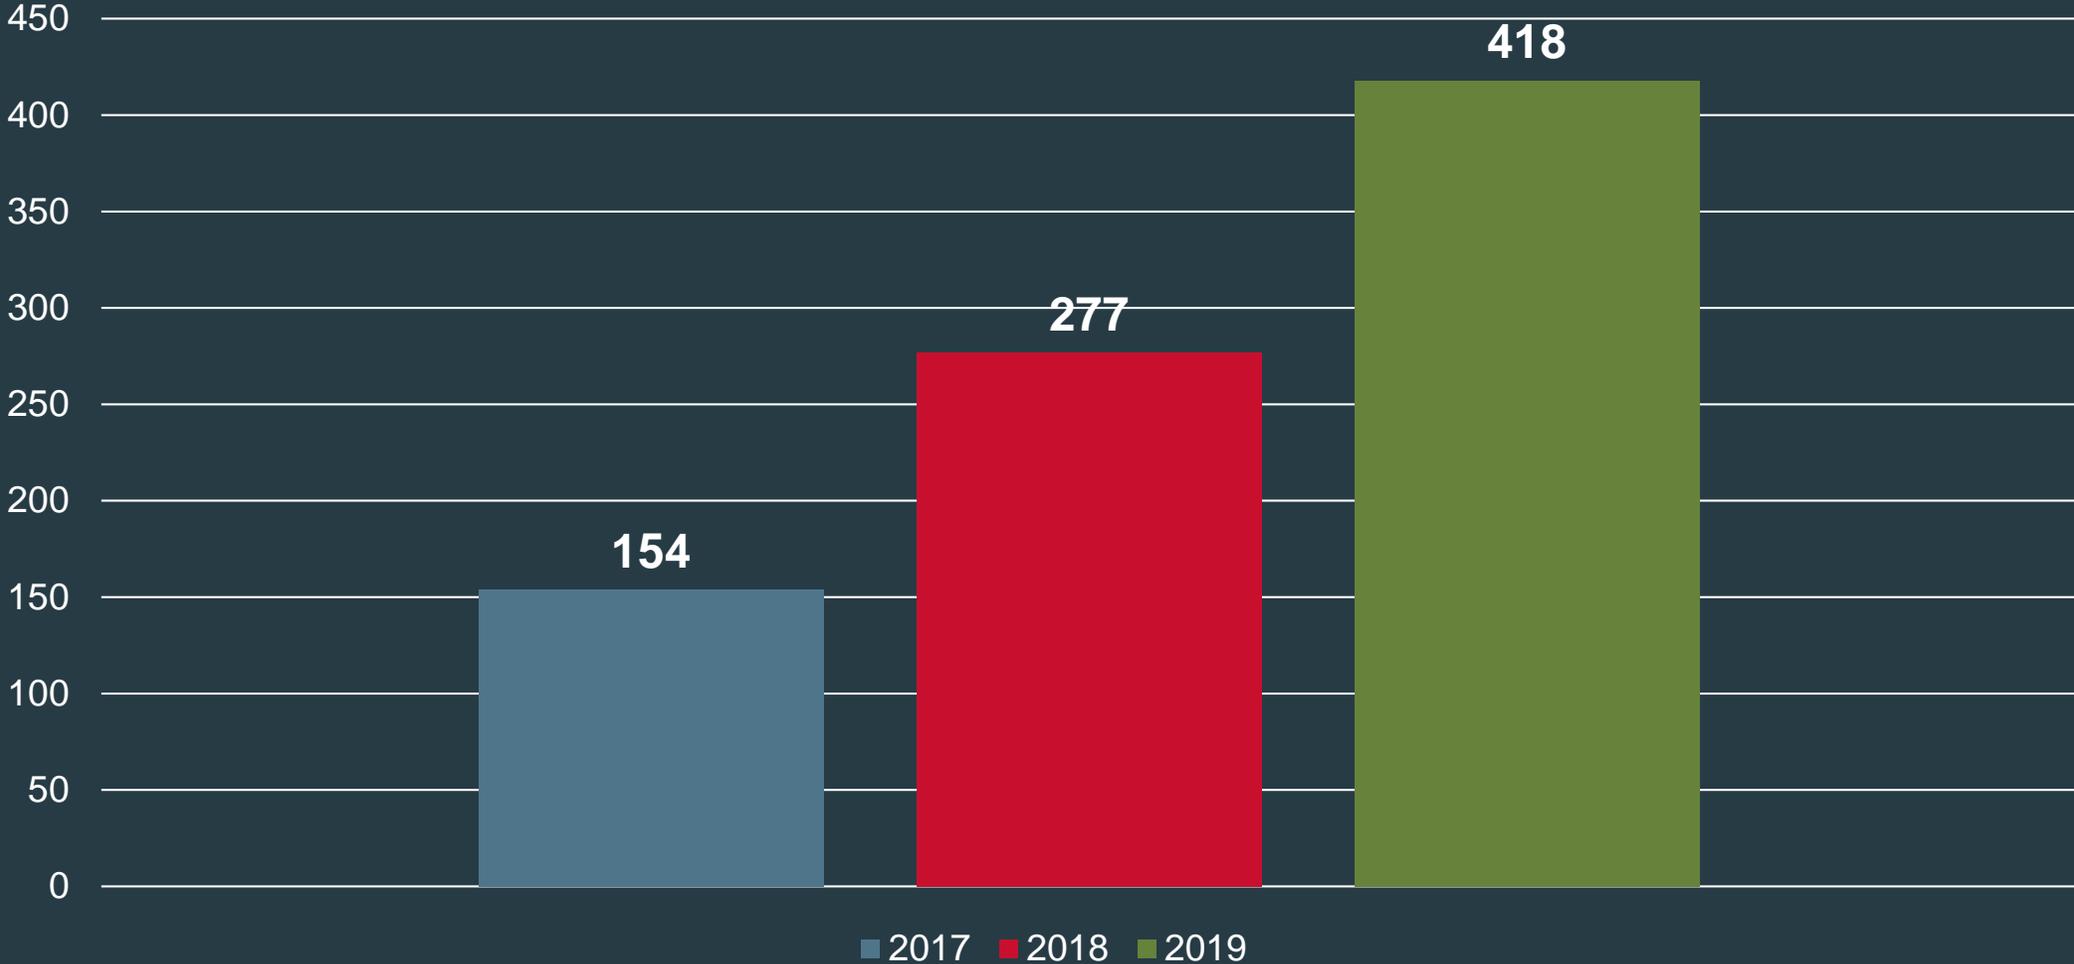

- **Sharing Best Practices**
To promote quality and accountability in the field
- **Education**
To facilitate the adoption of digital measures and related standards
- **Collaboration**
Collaborating to build a vibrant digital measurement community
